Features

RealAge® Test

How old are you – really? Sharecare's RealAge Test is a scientifically-based assessment that shows you the true age of the body you're living in based on your behaviors and existing conditions.

Personalized timeline

When you open Sharecare, once you complete your RealAge Test, you can scroll through your timeline for personalized and relevant tips, recommendations, topics, articles and videos. The more you use your timeline, the more personalized it will become.

Green day trackers

Sharecare created green day trackers that monitor the core health factors that influence your health the most. Each key health factor is rated on a five-point color scale from green to red, and your goal is to be "in the green" for the majority of the trackers each calendar day to earn a green day.

Health profile

Your Sharecare profile is a living, breathing, evolving story of your health. You can securely store and access all your biometrics and health data in your profile. Rest assured that your personal health information entered in the Partners for Health wellness program is not shared and is kept private and secure.

Benefits hub

Rather than navigate many websites and documents, you can review and use all of your benefits in one place.
